REQUEST FOR PROPOSALS — CONSTRUCTION SERVICES SANITATION DEPARTMENT SOLID WASTE BALER REPLACEMENT

The Petersburg Borough is seeking proposals for construction services related to the Sanitation Department Solid Waste Baler Replacement. The solid waste baler is used by the Borough to compact and bale approximately 2400 tons of garbage and recyclables per year. The selected contractor will supply and install a new baler and conveyor to replace the Borough's existing unit, and will also provide startup and training services for the new equipment. The proposal due date is 2:00 pm on Thursday, April 4, 2019. For more information or to request a copy of the RFP, contact Public Works Director Chris Cotta at (907) 772-4430 or ccotta@petersburgak.gov.

Public Service Announcement

Call for Energy Conservation

As a result of continued dry and cold conditions that are having an ongoing negative effect on the hydroelectric lake levels, PMPL has started a supplemental diesel power campaign.

Customers are encouraged to conserve power in order to reduce the overall requirement for generation fuel and water usage at the Tyee and Swan plants. Below are some tips to help our customers conserve energy needed for lighting and hot water.

- Water heating can account for 14%-25% of the energy consumed in your home. Take shorter showers, don't run hot water continuously, and wash clothes in warm or cold water.*
- Turn down the temperature of your water heater to 115-120 degrees F.*
- Check if your water heater has an insulating blanket. An insulating blanket will pay for itself in one year or less but don't cover the tank thermostat during blanket installation!
- Take showers with low-flow shower heads (they use 50% less hot water) instead of baths.
- Run only full loads in your dishwashers and clothes washers.
- Survey your incandescent light for opportunities to replace them with compact fluorescent lights (CFLs) or light-emitting diodes (LEDs). CFLs can save three-quarters of the electricity used by incandescents.* LEDs can save even more.
- Turn off your lights in unoccupied rooms or consider installing timers, photo cells, or occupancy sensors to reduce the amount of time your lights are on.*
- Put away holiday lights and save them for next year!
